

CFL
COLOR FOIL LAMINATION

375F

10M/Min

With
Rewinding

Max Paper
Height

Max Width:
360mm

Core 3 Inch

COMPATIBLE WITH THE WORLD'S TOP PRINTERS

KONICA MINOLTA

FUJIFILM

RICOH
imagine. change.

Canon

TOP FEATURES

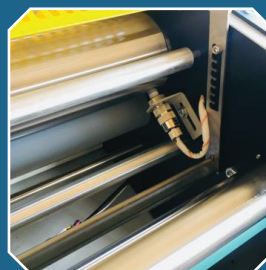

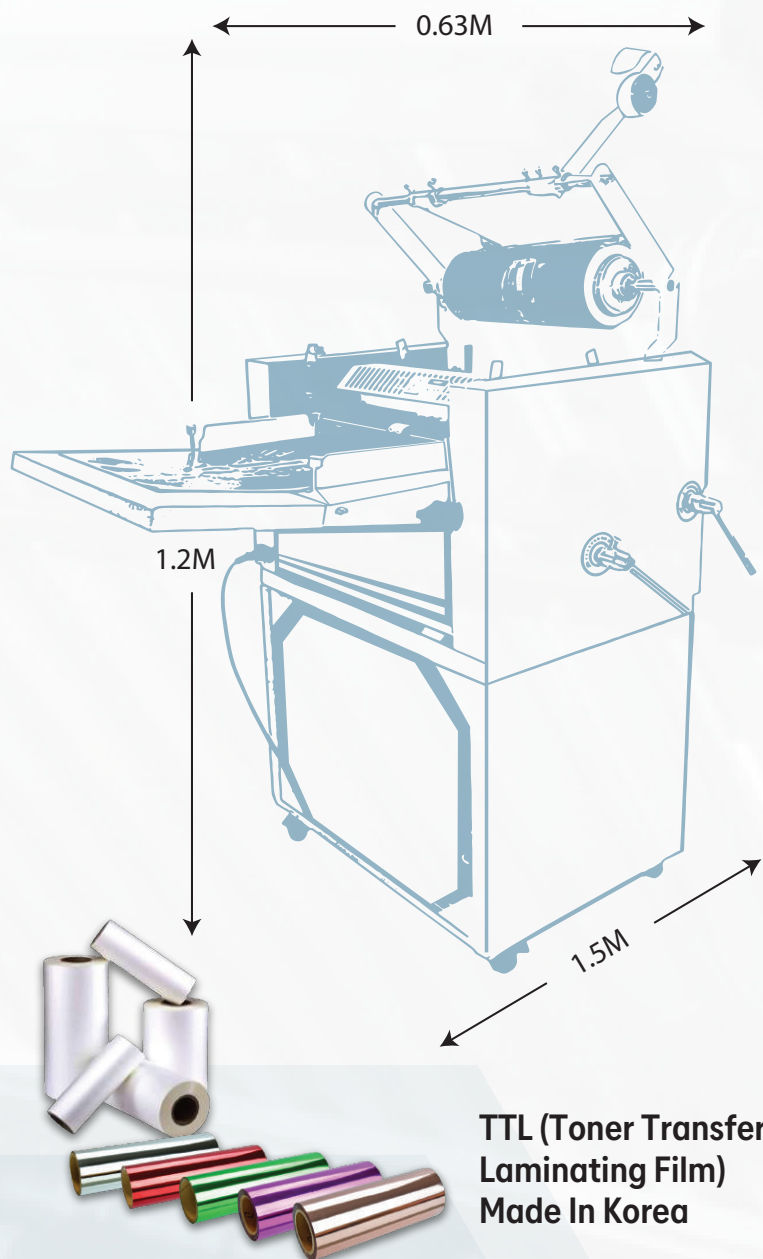

- 1 Automatic paper gap controller
- 2 Super-smoothly processed metal roller for high gloss lamination
- 3 Hot roller to avoid silvering (microbubble) High adhesion lamination
- 4 Sensor in the metal roller: fast and precise temperature control
- 5 3 inch core cylinder for perfect lamination results in dark patch jobs

DIGITAL TONER FOILING WITH AUTOFEED LAMINATING MACHINE

- 6 Lamp + oil heating technology in cylinder
- 7 Equipped with a special decurler for no damage on both side prints
- 8 Top & In-line perforator - Perfect bursting results
- 9 1 & 3 inch core roll holder provision for lamination films
- 10 2 in 1: laminator and foiling applications

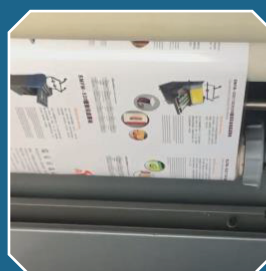

DIGITAL TONER FOILING WITH AUTOFEED LAMINATING MACHINE

Oil Heating

Heavy Duty Motor

With Slitting

Foil Roll Rewinding

MACHINE PARAMETERS

Model	375F	Dimensions(LxWxH)	1.5×0.63×1.2m
Max paper size	360mm	Pressure	0.1~0.5MPa
Maximum height of paper	30mm	Feeding mode	Automatic
Operating speed	0~10m/min	Feeding Method	Friction
Laminating temperature	80~125°C	With slitting function	with
Total power	1.8 Kw	Anti-curl function	with
Voltage	220V/50Hz	Foil Rewinding	Yes
