

HEAVY DUTY MUTE HYDRAULIC PROGRAMMED PAPER CUTTING MACHINE

22"

CP 5610 / 6810

26"

Suitable for Kappa Board & Card Board

Large keyboard
button of color
touch screen

Mute
technology

Intelligent
control

Infrared
protection

TECHNICAL PARAMETERS

| Model | Cutting Size (mm) | Cutting Thickness (mm) | Cutting Precision | Clamping Method | Display | Power | Machine Weight | Machine Dimension (mm) |
|--------|-------------------|------------------------|-------------------|-----------------------------------|--------------------------|------------------------|----------------|------------------------|
| CP5610 | 30-560 | 100 | ±0.2 | Hydraulic+ Mechanical Pedel | 10.2" Touch Screen | 220V 50Hz, 2.5KW | About 430KG | 1010x1320 x1500 |
| CP6810 | 30-680 | | | | | | About 530KG | 1090x1410 x1500 |

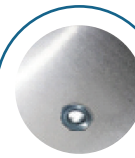

Heavy-duty integral casting frame design

Heavy-duty integral casting frame, enhanced design, stable machine, suitable for large-volume cutting.

Integral casting tool holder without chute design

Integral casting tool holder without chute design, no slipway wear and longer service life.

Thickened aviation aluminum plate with floating balls

Thickened aviation aluminum plate, with floating balls, easy to sort paper.

Two-hand cutting delay control design

Delay design of cutting button, safe operation.

Oblique knife cutting patent technology

Easier cutting, suitable for thick paper cutting.

Dimension error compensation function

The program corrects the size error and is easy to adjust.

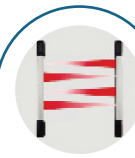

Mute dual hydraulic system

Mute hydraulic system, two-way hydraulic cylinder, external pressure adjustment.

Patent for paper pushing mechanism with double guide rods on top

Top-hung double guide rod paper pushing transmission structure, no slot paper pushing platform, high precision.

Infrared photoelectric safety protection

Front infrared safety protection design, rear shield safety protection, inline with CE standards.

Variable frequency hydraulic technology

Frequency conversion cutting technology, cut accurately, solve to different shades, increase blade and blade life.

Frequency conversion hydraulic system (380V to 220V), strong power, more force, more stability.

No need to replace centrifugal switches and capacitors, after-sales maintenance is more convenient.

Super silent technology, no noise in the paper cutting process create a quiet.
